EXPERIENCE

Software Engineering Intern

May 2026 – Aug 2026

Bell Canada – Network Cloud & Infrastructure Engineering

Toronto, ON

- Designed and shipped an enterprise VMware inventory platform from scratch using **Python, FastAPI, PostgreSQL, and OpenShift**, tracking **1,050+ ESXi hosts across 21 vCenters** and adopted as the team's system of record for hardware lifecycle reporting.
- Cut vCenter collection time from **34 minutes to under 30 seconds** by replacing thousands of per-host API calls with a single **PropertyCollector** request per vCenter.
- Replaced manual spreadsheet ingestion with **three automated nightly pipelines** (vSphere API, Cisco Intersight API, SharePoint via **Microsoft Graph**) deployed as Kubernetes CronJobs, eliminating a recurring daily manual process.
- Built a **per-host source-authority model** that resolves conflicting values across sources deterministically at the field level, so new API feeds are onboarded through configuration rather than code changes.
- Diagnosed and fixed a silent data-integrity defect where a null-sentinel cleaner was defined but never invoked, **repairing 1,247 corrupted rows** and preventing recurrence at the parsing layer.
- Introduced **ruff** static analysis and repaired broken pytest collection, restoring **202 tests** to the suite and surfacing latent production-code defects that had been passing silently.
- Built an operational **JavaScript** dashboard with lifecycle, data quality, scorecard, field history, and host-map views, including source attribution, inline editing, and client-side caching.

IT Manager

Summers 2023–2024; Jun 2025 – Apr 2026

Canadian Musicians Co-operative

Barrie, ON

- Led a team of **10+ developers and interns** using Agile Scrum to deliver **React/Node.js** internal applications serving **300+ active users**.
- Built workflow tracking and HR automation tools with **Google Apps Script, REST APIs, Express, and MongoDB**, replacing manual reporting across departments.
- Rebuilt company websites in **WordPress/JavaScript** and moved DNS and hosting to **AWS Route 53** with automated deployment, cutting downtime **20%**.

IT Support Specialist

May 2022 – Sep 2022

Canadian Musicians Co-operative

Barrie, ON

- Documented IT procedures and built remote-team onboarding workflows with **Google Workspace automation**, supported server maintenance and website deployment.

PROJECTS

Wood Stove Leather Goods — Capstone | *Angular, Node.js, MongoDB, AWS*

- Built and deployed a full-stack e-commerce application with **Angular, Node.js, and MongoDB**, including an inventory management module, hosted on **AWS Elastic Beanstalk**.
- Implemented a **CI/CD pipeline** and containerized deployment workflow to automate builds and releases.

EDUCATION

Honours Bachelor of Computer Science

Graduating Sep 2026

Sheridan College

Oakville, ON

Computer Programming and Systems Analyst (Diploma)

Dec 2022

Sheridan College

Brampton, ON

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Java, C#

Backend & Data: FastAPI, SQLAlchemy, PostgreSQL, Alembic, REST APIs, MongoDB, Node.js

Cloud & DevOps: Kubernetes, OpenShift, Docker, GitLab CI/CD, AWS, Microsoft Graph API, Git

Frontend: React, Angular, HTML/CSS

Practices: Agile/Scrum, static analysis, automated testing, database migrations, production debugging, technical documentation
