EXPERIENCE

IT Manager

Barrie, Ontario

Canadian Musicians Co-operative

Mar 2023 - Sep 2023

- Lead strategic technical projects aligned with the Co-op's objectives, resulting in enhanced productivity. Additionally, oversaw rigorous data-driven improvements across multiple applications and technology processes.
- Effectively **managed a team of more than 25 IT members** and cultivated strong relationships with external vendors and advisers. Encouraged a culture of thorough documentation for business applications and APIs.
- Demonstrated strong financial acumen by analyzing and forecasting budgets, ensuring that **100% of technical projects were delivered** on time and within budget. Streamlined company-wide onboarding with a **25% reduction in new tool adoption time**. Facilitated interviews for over 50 candidates by coordinating schedules between hiring teams and applicants.
- Provided valuable support to employees by addressing inquiries related to IT roles and collaborated with the HR team to develop comprehensive documentation and training materials for staff onboarding.
- Enhanced HR department efficiency through timesheet approvals and time-off request management, leading to a notable workload reduction.
- Collaborated with a team to design and develop a CRM website using **WordPress**, while also enhancing the functionality of the Onvia website using **HTML, CSS, and JavaScript**.

Computer Systems Analyst Intern

Barrie, Ontario

Canadian Musicians Co-operative

Oct 2021 – Sep 2022

- Resolved all technical and concerns efficiently and expeditiously, and successfully made a website page from scratch using Wix.
- Successfully made and managed multiple reports, platforms, and projects, and helped in debugging an Android app using scripts.
- Promoted to the position of IT supervisor after less than a month for exceptional organizational skills and exceeding KPIs and manage a team of IT members.
- Trained and mentored new and existing members and interns created many demo videos and documents for them and was part of the Health and Safety Committee.

PROJECTS

- Designed and implemented a multi-class card game, employing **OOP** principles and robust error handling techniques. The project also encompassed the creation of a comprehensive class diagram using Visual Paradigm, all of which were integral components of 'Deliverable 3 – War Card Game'.
- Successfully created Student Registration Management (SRMS) using **ASP.NET** using **MVC**, with validation. Able to do any **CRUD operations** to students and courses classes and able to enroll students into any courses.
- Proficiently engineered a website in collaboration with a capstone team, leveraging the **MEAN stack** for seamless customer order management and display. Demonstrated excellence by securing 3rd place among 16 competing groups.
- Designed and developed a mobile application using Kotlin and Android Studio, incorporating a database, to seamlessly monitor and manage exercise and dietary activities, with full CRUD functionality.
