EXPERIENCE

Information Technology Manager

May 2023 – Sep 2023

Canadian Musicians Co-operative

Barrie, ON

- Directed strategic tech projects to align with Co-op objectives; executed automation of manual processes, realizing 25% efficiency gain.
- Managed a **25+ member IT team**, fostering vendor relationships, and promoting thorough documentation for applications and APIs.
- Demonstrated financial acumen, analyzing budgets, ensuring 100% on-time, on-budget project delivery, and **reducing new tool adoption time by 25%**.
- Facilitated 50+ interviews, coordinating schedules between hiring teams and applicants.
- Orchestrated IT role support for 500+ employees, collaborating with HR to devise and implement a comprehensive on-boarding documentation; this streamlined time-sheet approvals, saving 15+ hours weekly.
- Participated in the design and development of a WordPress CRM website, and improved Onvia website functionality using HTML, CSS, and JavaScript.

Computer Systems Analyst Intern

Oct 2021 – Sep 2022

Canadian Musicians Co-operative

Barrie, ON

- Proficiently addressed technical issues while also creating new Wix website pages.
- Managed reports, platforms, and projects, assisting in Android app debugging through scripting.
- Received prompt promotion to IT supervisor due to outstanding organizational skills and exceeding KPIs.
- Provided training and mentorship to team members and interns, while also contributing to the Health and Safety Committee.

PROJECTS

War Card Game | *C sharp, SDLC, NET Framework, Git*

Apr 2020

- Led the creation of a project centered on the classic card game "War," a two-player game where the highest card wins, serving as the culminating project for the course.
- Collaborated in a team for a Software Design Fundamentals course project, successfully developing a multi-class program following **Object-Oriented Programming (OOP)** principles, including error control and user diversity accommodation.

Rock Paper Scissors Game | *Ionic framework, Angular, Node.js, Typescript, Javascript,*

Feb 2022

- Designed and executed a RockPaperScissorsGame application utilizing Angular framework, showcasing expertise in **Typescript and Angular development**.
- Utilized Angular components and services to craft a dynamic user interface and game mechanics, demonstrating problem-solving abilities and a strong focus on user experience design in web development using Angular.

Wood stove Leather Goods Capstone Project | *Web App, Mean Stack, AWS, Git*

Dec 2022

- Directed the development of Wood Stove Leather Goods' full-stack website, employing Angular for front-end and Node.js/Express with MongoDB for back-end functionality.
- Implemented cloud technologies like AWS Elastic Beanstalk, S3, and Route 53**, ensuring client communication and meeting project deadlines consistently.

Fitness App | *Android App, Kotlin, XML, Database, Git*

Dec 2022

- Engineered a robust Android fitness application using Kotlin and XML for front-end design and functionality, seamlessly integrating with a back-end database to manage user profiles, exercise data, and progress tracking.
- Applied advanced database management techniques, such as SQLite and Room Persistence Library**, to effectively manage and query user data, ensuring smooth synchronization across devices and optimal application performance.
