EXPERIENCE

Information Technology Manager

May 2023 – Sep 2023

Canadian Musicians Co-operative

Barrie, ON

- Led strategic tech projects aligning with Co-op objectives, enhancing productivity
- Managed a **25+ member IT team**, fostering vendor relationships, and promoting thorough documentation for applications and APIs
- Demonstrated financial acumen, analyzing budgets, ensuring 100% on-time, on-budget project delivery, and **reducing new tool adoption time by 25%**
- Facilitated 50+ interviews, coordinating schedules between hiring teams and applicants
- Provided IT role support, collaborated with HR on comprehensive onboarding documentation, and streamlined timesheet approvals
- Collaborated on designing and developing a WordPress CRM website and enhancing Onvia website functionality with HTML, CSS, and JavaScript

Computer Systems Analyst Intern

Oct 2021 – Sep 2022

Canadian Musicians Co-operative

Barrie, ON

- Efficiently resolved technical issues, rapidly creating a Wix website page
- Managed reports, platforms, and projects, aiding in Android app debugging with scripts
- Promptly promoted to IT supervisor for exceptional organizational skills and surpassing KPIs
- Trained and mentored team members, interns, and contributed to the Health and Safety Committee

PROJECTS

War Card Game | *C sharp, SDLC, NET Framework, Git*

Apr 2020

- Led the creation of a project centered on the classic card game "War," a two-player game where the highest card wins, serving as the culminating project for the course.
- Collaborated within a team for a Software Design Fundamentals course project, successfully developing a multi-class program adhering to **Object-Oriented Programming (OOP)** principles, encompassing error control and accommodating user diversity.

Rock Paper Scissors Game | *Ionic framework, Angular, Node.js, Typescript, Javascript,*

Feb 2022

- Designed and implemented a RockPaperScissorsGame application using Angular framework, demonstrating proficiency in **Typescript and Angular development**.
- Angular components and services to create a dynamic user interface and game mechanics, showcasing problem-solving skills and a keen eye for user experience design in web development with Angular.

Wood stove Leather Goods Capstone Project | *Web App, Mean Stack, AWS, Git*

Dec 2022

- Led the development of Wood stove Leather Goods' full-stack website, utilizing Angular for front end and Node.js/Express with MongoDB for back-end.
- **Implemented cloud technologies like AWS Elastic Beanstalk, S3, and Route 53**, ensuring client communication and meeting project deadlines consistently.

Fitness App | *Android App, Kotlin, XML, Database, Git*

Dec 2022

- Developed a robust Android fitness application leveraging Kotlin and XML for front-end design and functionality, integrating with a back-end database to store user profiles, exercise data, and progress tracking information.
- **Implemented advanced database management techniques, including SQLite and Room Persistence Library**, to efficiently manage and query user data, ensuring seamless synchronization across devices and optimal performance of the application.
